PROFESSIONAL SUMMARY

Skilled in working with Python, SQL, data visualization tools, and analytical techniques to extract meaningful insights from complex datasets. Experienced in developing academic and personal projects involving predictive analytics, AI-based solutions, and data-driven decision-making. Possesses knowledge of machine learning algorithms, data preprocessing, exploratory data analysis, and model evaluation.

SKILLS

Python, Pandas, NumPy, Matplotlib, Seaborn, Machine Learning Foundation, Data Analysis, Data Cleaning, Data Visualization, SQL, Power BI, Tableau, Git, GitHub, Linux, Jupyter Notebook, VS Code, HTML, CSS, JavaScript, Problem Solving, Analytical Thinking, AWS (EC2, S3, Lambda, RDS, VPC), Microsoft Azure, Google Cloud Platform (GCP), Docker, Kubernetes, Terraform, Ansible, CI/CD (GitHub Actions, Jenkins) **Networking:** Load Balancers, DNS, Firewalls, VPNs, Subnets, **Monitoring & Security:** CloudWatch, IAM.

PROJECTS

Predict AI — AI Stock Prediction Web Platform

- Collaborated with a college team to design and build Predict AI, a full-stack AI-powered platform for predicting stocks, crypto, commodities, and currency markets.
- Built the cloud infrastructure on AWS (EC2, S3, Lambda) to host the backend prediction engine and serve real time market data via REST APIs.
- Implemented Live Market Snapshots dashboard with asset filtering (Stocks, Crypto, Forex, Commodity) and a scrolling ticker using Python backend + JavaScript frontend.
- Integrated an AI Prediction Machine supporting popular assets (INFY, HDFC, AAPL, TSLA, MSFT, AMZN, Gold, Crude Oil) with a search interface for custom tickers.
- Designed the 'Find Professional' section connecting users with verified market experts (Stock, Crypto, Forex, Commodities) including booking consultation workflows.
- Containerized the application using Docker and deployed CI/CD pipeline via GitHub Actions for automated builds and deployment.

Education Analysis Dashboard (Tableau)

- Designed interactive dashboards to visualize educational data effectively.
- Performed data cleaning and preprocessing for accurate analysis.
- Created KPI metrics to monitor student performance and attendance.
- Used bar charts, pie charts, line graphs, and filters for dynamic visualization.
- Conducted trend analysis to identify academic performance patterns.

Eco Guide AI – Campus Sustainability Assistant

- Developed an AI-driven sustainability platform for carbon footprint calculation, water usage optimization, and waste segregation awareness.
- Built interactive dashboards and automated recommendation features to encourage sustainable decision-making.
- Deployed a scalable web application using Streamlit Cloud for seamless user access.
- Utilized data analysis techniques to generate actionable environmental insights and personalized sustainability suggestions.

ACHIEVEMENTS & CERTIFICATIONS

- IBM SkillsBuild Winter Certification Program 2025, Data Analytics & Business Intelligence Lab: Explore, Analyze & Build Real-World Solutions.
- 1M1B | AI + Sustainability Virtual Internship.
- AWS Academy Graduate - Cloud Architecting.
- TATA — Gen AI Powered Data Analytics Job Simulation.
- Deloitte — Data Analytics Job Simulation.
- Infosys — Introduction to Business Intelligence.
- Coursera Google Ask Que to make data driven.
- Coursera Google Data Data Everywhere.
- IBM Journey to Cloud Envisioning Your Solution.

EDUCATION

Bachelor of Technology in Computer Science & Engineering

Silver Oak University, Ahmedabad | *Batch: 2023-2027*
